

Fourth Grade Authors

After months of hard work, the fourth grade Pennsylvania ABC books are finished! Students researched the state over the past five months and created a picture book using the facts they learned. Each page of the book has a fact as well as a picture. Some students used pictures found on the internet, others drew their own, and some students even added pictures of themselves at various places around the state.

As a culminating activity, students were given the opportunity to share their favorite page with their classmates. Many chose a favorite fact that they learned while they were working on the book. Others chose a fact that they thought their classmates wouldn't have. It was a great time of sharing and learning.
